Seeking a job opportunity with a focus on Full Stack

Summary

· **3+ years** experience in Software Development
· **Objective**: Become Software Engineer Specialist

Skills & Background Knowledge

Programming Languages	JavaScript & TypeScript, Java
Tools	Visual Studio Code, Visual Studio, Linux, Docker, VPS
Foreign Languages	**English**: Professional Working Proficiency, **Japanese**: very basic
Frameworks, Libraries	**FrontEnd:** ReactJs, NextJs, Material UI, BootStrap, Redux, Zustand, Context Provider, TailWind CSS, Shadcn, GraphQL Client, Rest API **BackEnd**: SpringBoot, GraphQL Server, Rest API **Database**: MySQL, MS SQL Server, Firebase
Others	Strong understanding of OOP methodologies and SOLID principles Experience with Docker, Linux and VPS Effective troubleshooting and problem-solving skills Proficiency in designing and implementing responsive user interfaces Capability to optimize application performance through best practices Experience in collaborative work with backend developers to define API contracts Outstanding communicating and presenting skills

Projects

GLSOFT-FULLSTACK ENGINEER   JUN 2023 – NOW

EV CHARGER MANAGEMENT PROJECT

Responsibilities	Evaluate front-end technologies, make design decisions, and migrate legacy front-end projects to newer technologies. Collaborate with Business Analysts to gather requirements and provide consultancy. Perform demonstrations to users after every sprint. Design and implement responsive user interfaces using Next.js, TypeScript, and SCSS. Optimize application performance through best coding and design practices. Integrate GraphQL for efficient data fetching and state management. Participate in code reviews to maintain high coding standards and share knowledge within the team.

	Troubleshoot and resolve issues to ensure application stability.
	Manage Docker containers for development, testing, and production environments.
	Work with backend developers to define and implement API contracts.
Description	Develop and manage the Admin Page for charger management for electric vehicles in Hong Kong and Thailand, including CRUD operations and analytics, reporting using NextJs
Technologies	Frontend: NextJs, TypeScript, SCSS, Bootstrap, Context Provider, GraphQL Client, Apex chart, react-dnd
	Backend: Spring boot (3.0.1), GraphQL Server, Redis, Java (17)
	Database: MySQL
	Deployment: Docker

Personal Projects

BLOG   MARCH 2023 – JUN 2023

Demo Link	https://blog.phuongtran.site/
	Demo account: user1@gmail.com / password: 123456
Git Hub	https://github.com/dphuong2103/blog
Function	Implemented secure user authentication system with email and password, ensuring data protection using JWT for session management.
	Developed a robust sign-up feature with validation and error handling for seamless user onboarding.
	Designed and integrated a paginated blog listing, optimizing performance and user experience for large data sets.
	Engineered dynamic blog detail views, enabling users to access content-rich blog posts.
	Built a blog creation tool supporting MDX format, allowing seamless integration of Markdown with React components for enhanced content flexibility.
	Implemented search functionality, providing users with fast and accurate content retrieval.
	Added a dark mode toggle, improving user experience with a customizable UI theme option.
	Response view for all devices
Technologies	Frontend: NextJs, TypeScript, SCSS, Shadcn, Tailwind
	Backend: Spring boot
	Database: MySQL
	Deployment: Docker

TIMELESS LOVE   JAN 2023–MARCH 2023

CH Play	https://play.google.com/store/apps/details?id=com.midouz.timeless_love_app&hl=en&gl=US
Git Hub	https://github.com/dphuong2103/TimelessLove
Function	Available in English and Vietnamese
	Get in a relationship with another user by relationship code
	Create, update, and delete questions
	Store answers of couples
	Notify when a new user adds or answers a question
Technologies	Flutter, Firebase

COUNTDOWN   JAN 2023–MARCH 2023

Demo	https://dphuong2103.github.io/CountdownTimer/
Git Hub	https://github.com/dphuong2103/CountdownTimer
Function	Simple countdown timer for setting timer and countdown will start.
	Sound notification when the countdown finish
	Responsive design
Technologies	Javascript, scss, html

Work Experience

Company	Position	Software	Time
GLSoft	FullStack Engineer	EV Charger management	Jun 2023 – Now
Honda VietNam	IT Support, Consultant	SAP SuccessFactors, VnResource HRM	Jun 2020 - Jun 2023
VnResource	Project Engineer, Project Leader	VnResource HRM	Jun 2019 - Jun 2023

Education

University of Information Technology (UIT)

Degree of Engineer in Information Technology

Foreign Trade University (FTU)

The Bachelor of Business Administration
